When I was a kid we used to
drink forties on the west
side highway. One night a
bunch of black guys on
Ninja bikes were going way
too fast. A car turned onto
the highway and clipped one
of them. The guy flew off
the bike and hit the ground
face first. Dead. He never
moved again.
His bike was still spinning
around on its side when his
friends turned around and
rode back. They surrounded
the car and kicked in the
windshield.
When they dragged the diver
out of the car it turned out
to be an old Chinese man.
They beat the shit out of him.
Kicked him in the throat.
And stomped on his neck
until it broke.

Der Leichnam eines irakischen Soldaten liegt in eine Decke eingerollt in der Nähe seines Schützengrabens auf der Halbinsel Al-Faw. Britische Expeditionstruppen nahmen das Gebiet ein und bildeten einen Brückenkopf. Sie sicherten die Ölanlagen und den Nachschub von See. Nach irakischen Angaben gab es in den ersten Kriegstagen mehr als 200 Opfer

Puk" the robot bastard child of Mickey Mouse and Astro Boy, giving a futuristic slant to the generic label.

Walter's reference points mirrored the fashion press of the time; new and forward-thinking style magazines reeked of the same youthful exuberance and social irreverence. Fashion was exciting and silly, echoing the DIY ethos of punk, and all it took was a savvy German businessman to capitalise on this sudden flow of creativity. Walter was approached with a deal that at the time seemed too good to pass up. Total creative control was offered over W&LT, and in return the backer would come up with the financial clout to make W&LT a worldwide name. Overtly ambitious Walter thought this was a marriage made in fashion heaven and that he was on the way to realising the full potential of his label.

Their intense collaboration was hard work, but paid off with commercial and creative success as Walter's six W&LT ranges captured the energy and spirit of the time.

By 97 the backers behind W&LT feared that his experimentation with materials like latex, rubber and plastics, and homo-eroticism would instigate commercial failure. They alleviated Walter of some of his control, instructing him to imitate rather than originate, "I was told what to do, who to copy, which colours to use. The whole spirit of the product was flattened and became extremely commercialised."

Walter had stopped designing his main line collections to concentrate on the W&LT range, so had no avenue to showcase his ideas. "A lot of designers probably wouldn't mind and would just decide to count the money, but I felt horrible." Due to contractual obligations, Walter found that his post as designer wouldn't be alleviated until 2003 even though it was his name, label and ideas that were being tampered with. Left with no other option, he started a legal war which lasted for years and almost bankrupted him in the process. "As usual the small designers are losing the battle and their name, label, spirit, and character becomes the property of the company. I was left with nothing."

During the legal wrangling Walter anonymously brought out a new label, Aestheticterrorists, alongside a design laboratory eponymously named Walter Van Beirendonck. A back to basics approach was essential due to financial constraints and the fact that his fingers had been severely burnt.

"For the next few years I worked as
